

Car Stopper

This is a modular product for controlling parking areas and vehicles access and is the lighter duty version of our three vehicle stoppers.

Each module is a metre in length and weighs 7 kg so is well within manual handling limits. No excavation is required as each module is bolted directly to surface with three fixings, enabling them to be easily re-located as requirements and layouts change. The module is moulded in black recycled rubber making them environmentally friendly and extremely durable.

Model	Height	Width	Length
Car Stopper	70mm	140mm	1000mm
Weight – 7Kg			

Fixings :- 3 x M10 x 120mm long Stainless Steel A2 grade coach screws with mud guard washers and 14Ø nylon Rediplugs

Packaging Details

Dependant of size of order. Either supplied on a standard pallet or if a small quantity is required then they may be wrapped and delivered via courier.
